	Comment	Approx tally	Action / Clerk's Comment
1.	**Make sure that the bins are serviceable** Existing dog poo bins all broken and need replacing	two	Order to SHDC pending
2.	**More bins – including where walkers enter/leave the village –** ie top manor street / junction rectory lane/ start of footpath to Bozomzeal, end of higher street top of Shute lane or higher Street turning bay Bins need to be accessible for bin men.	two	Bins on Shinners Meadow footpath and opposite Dittisham Court might be relocated to Higher Street turning bay and ? [can we find an acceptable location in area of Rectory Lane?] I requested a map from SHDC, on 26/10 -after I was surprised to find a bin outside Shinners Cottages at the start to the footpath!
3.	Dog poo bin needed **near the quay - ?turning circle**	six	Is the Sunnybank wall worth trying?
4.	**Make the bins more visible**. Dog poo bin on Riverside Road opposite the court hidden.		
5.	**What are the criteria for locating a bin?**		SHDC reply - we avoid placing any bins in close proximity to the properties for this reason.
6.	Bye laws that require **dog on lead at all times**, except possibly The Ham – with some reservations because it's a children's play area, but in consideration of people who don't have gardens The other issue of dogs not being on leads and therefore their owners not knowing where they are or what they are doing, will continue to be a problem, with or without bins. I have seen dogs make a mess on the beach by the Quay, when their owners are either in the pub or on the pontoon and unaware of what is happening. This is not good given the number of children who play on the beach when the tide us out and the football across the beach. Then there are the dogs who run down Manor Street unaccompanied, who make a mess without being seen by their owners, which then is not picked up.	two	DPC is considering advertising the dog on lead PSPOs which apply to car parks and to all areas covered by Rule 56 of the Highway Code i.e., on the road, or on the pavement, or on a path shared with cyclists or horse riders.
7.	Use of more **positive messaging for signs** / perhaps adding in humour: Someone said "Positive messages like "dogs welcome but leave just just paw prints" work."		
8.	**Bins could have label** to effect ask to keep village clean by putting poo bag in bin – suggest version Reinforce what is being asked and why Respectful request rather the must /s should.		SHDC has provided stickers for bins – same as its posters
9.	**Metal maps showing locations of bins - about ¼ A4**		
10.	A **little pamphlet showing the location of bins and dispensers**, and **reminding dog owners of their responsibilities,** should be made available to all visitors. If there is a map of Dittisham on the website, it might also be helpful to mark the positions of the bins and dispensers		
11.	**dog poo bag dispensers at bin location** I also believe that the addition of dog poo bag dispensers at these three locations would help dog owners to behave in a responsible manner. In my travels abroad I have always found the provision of poo bags combined with poo bins leads to cleaner parks and public areas.	two	
12.	I believe that only by **naming and shaming** those seen to not clean up will really stop it and individuals must have the moral courage to see the unpleasantness through.		
13.	In my view there has only ever been one solution - **surveillance**: purchase a few wireless camera traps - or maybe just one plus some dummies and make it known on notices. I know it is controversial but it is pointless making rules if the antisocial few cannot be named and shamed. If the consensus is that surveillance is unacceptable then just accept the poo.		We would need to consider privacy / legal implications.

Facebook - Taking photos / cctv to try to identify who the offending owner is. They did not suggest the course of action after that.		
14. Other than banning dogs I'm not sure what you can do, like litter it's about personal responsibility. Too many expect others to do the work This I see is the biggest issue, there will be owners who pick up after their dogs and they will use the bins. But there will equally be more who will not pick it up, if they are not aware where their animals are or what they are doing. Thought needs to be given as to how this can be resolved.	two	
15. Maybe an occasional **dog warden on patrol** with powers to fine offenders and a sign saying dog wardens operate here?		Arrange with SHDC.
16. National flags in all the dog poo - aka the Danish experiment.		*100 £2.50. Needs to be biodegradable. Tried in Cornwall – I will try to find out if it worked LINK
17. Dog training events as outreach and education.		
18.The fact that no **street verge clearing** has taken place, and vegetation has been allowed to grow along the walls of the properties, dogs off the lead are freely relieving themselves and the waste is just left.		
19. The removal of the waste bins in Manor Street has caused a most unpleasant and unhealthy situation. Most dog owners seem keen to act responsibly and ask where the Dog Waste Bins are Sited. The removal of three waste bins in Manor Street has resulted in dog owners dropping the dog waste bags in the gutter, a front garden or in the road. The **gutters are no longer cleaned** unless householders take on the job, so the dog waste remains and is gradually covered by leaves and debris. The problem has been more noticeable this year as we have had many more visitors and a great number of dogs. It is a very unpleasant and unhealthy situation and I hope you will consider **reinstating at least 2 bins**.
